
(a)
$Re = 10$, rotor
$Re = 10$, stator
$Re = 1$, rotor
$Re = 1$, stator
tight (c), $Re = 10$
$v_n / U \times 10^3$
$p / (\rho U^2)$
(b)
$n = 250$
$n = 500$
right wall,
below the lid
lid, left end
$v_n / U \times 10^3$
$p / (\rho U^2)$
(c)
bottom
left
right
lid
$n = 250$
slope 0.0079
$\Delta v_n / U \times 10^3$
$p / (\rho U^2)$
(d)
$n = 500$
slope 0.0080
$\Delta v_n / U \times 10^3$
$p / (\rho U^2)$
