SPH against the exact solution (w = 0 on both walls)
K = 3, m = 2 (l = 25 dx, g = 100 dx)
K = 3, m = 10 (l = 10 dx, g = 200 dx)
v_θ / U
w_z / Ω
$(r - R_1)/g$
exact
SPH (bins of one dx, about fifty shown)
